

Installation and Commissioning workshop at DENIM 2016

Erik Johnson

ISIS STFC

Workshop

- Two talks to introduce the subject
 - Erik Johnson from ISIS
 - Jerome Beaucour from ILL
- Discussion subjects
 - Project Management
 - Procurement
 - Crane issues
 - Storage

- More subjects could have been explored but ran out of time

Learning

- Wide range of different management arrangements employed by different facilities

One Person follows project/
conception of beamline to Operation

Hand over at each stage (Design,
Construction, Commissioning and
Operation)

- Safety Management varies due to local rules
- Procurement and concerns about not so different

Exchange of knowledge

- Shared issues and learning on:
 - Crane dead zones
 - Storage areas or lack of
 - For active shielding and components removed during maintenance periods
 - Longer term storage of materials for new builds

Conclusions

- Project and Safety Management
 - Different localities and organisations have different requirements put on them
- A one size fits all approach is not going to work across all institutes.
 - Different legislative bodies and organisational structures
- We all have a great deal of wisdom to share on Installation and Commissioning
 - A future workshop could concentrate on a particular aspect of Installation and Commissioning
 - I hope everyone found the session useful
 - Thank you Jerome for your talk
 - Thank you to all that participated
